

**INTERNSHIP CERTIFICATE**

Mr. Stefan Römer,  
born on December 22, 1979,

completed a five-month internship in our company's software development department from October 10, 2005 to March 10, 2006.

Topic of the internship:

Development of an automated loading tool for the application software of the Doors and Slides Management System of the Airbus A380.

Contents:

The Doors and Slides Management System is a system that drives and centrally monitors the passenger doors and hatches of the Airbus A380. It is possible to load software updates (for testing purposes) into this system. The content of the internship was the development of a configurable tool that...  
Can carry out the charging process safely and quickly.

In connection with this work, Mr. Römer had to acquire knowledge in the following subject areas:

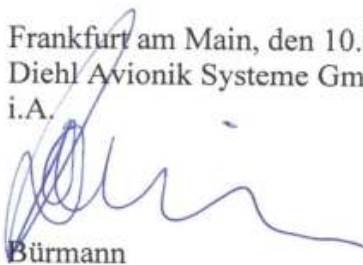

- Detailed knowledge of the possibilities of the C programming language
- Microsoft Visual Studio development environment
- LabWindows / CVI development environment from National Instruments

Mr. Römer familiarized himself with the topic within a very short time and was able to implement the task very quickly. He showed a very high willingness to delve into subject areas that were unfamiliar to him. He was able to apply what he had newly learned quickly and always successfully. Mr. Römer carried out the work assigned to him very purposefully, extremely independently and to our complete satisfaction.

We got to know Mr. Römer as a conscientious, hard-working, reliable and helpful intern whose behavior towards superiors and colleagues was exemplary.

We wish Mr. Römer continued success in his studies.
